Education

Boston University, Boston, MA

May 2027

Bachelor of Science in Data Science (BS), Minor in Pure Mathematics | Cumulative GPA: 3.70/4.00 | IB: 44/45

- **Honors:** Dean's List AY23/24, AY24/25
- **External:** McKinsey Future Women's Leaders (APAC)
- **Co-curricular involvements:** Student Government Financial Affairs (Steering Committee), Singapore Students Association (Operations Chairman), BU Venture Capital Group (Advanced Sourcing Capstone Project), BU Consulting Group (Analyst)

Professional Experience

Boston Consulting Group, Singapore, SG

May 2025 – August 2025

Case Team Assistant

- Project description: Design and rollout of agentic AI tools deployed to private bankers, aimed at solving personalization and engagement challenges across large client portfolios.
- Facilitated 15+ focus groups of top performing bankers (15-20 per session) to co-develop business logic connecting field pain points to product design, personally managing client communications throughout.
- Built an automated pipeline consolidating 100+ survey and bank data fields, cutting dataset size by 50% and ensuring seamless updates with each new data load.
- Defined how personalized investment content should vary based on historical trading behavior and banker relationships; collaborating cross-functionally to integrate logic and finetune prompt engineering for consistent, best-in-class AI outputs.
- Authored targeted outreach materials and secured test participation from 150+ high-net-worth private wealth clients.
- Owned final 29 page client-facing presentation, detailing testing timeline, product overview, and key KPIs for further phases.

Human-2-Everything (H2X) Lab, Boston University, Boston, MA

November 2024 – May 2025

Computer Vision Research Assistant

- Led testing of autonomous vehicle models, designing 17 edge-case crash scenarios (using CARLA and Roadrunner), aligned with NHTSA regulations to ensure a robust testing framework for safety-critical scenarios in simulated environments.
- Improved a real-time navigation application for the visually impaired, integrating object detection, depth sensing, and natural language generation to transform complex visual scenes for 25% more accurate contextual speech guidance.

Oliver Wyman, Singapore, SG

June 2024 – September 2024

Actuarial Consulting Intern

- Project descriptions: Enhanced a leading Singapore bank in bancassurance offerings through primary/secondary research and competitor benchmarking; Evaluated ASEAN market entry for a global reinsurer via opportunity sizing and risk modeling.
- Initiated, syndicated and operationalized a comparative dashboard using R and Shiny to analyze insurance premium structures across U.S. and Asian markets, enabling clearer strategic positioning.
- Authored monthly client newsletters on emerging insurance themes including sustainability and notable PE backed deals.
- Created reference material on Singapore's monetary authority's regulatory shifts, used across multiple insurance projects.

Leadership and Extracurricular Involvement

Boston City Council, Boston, MA

September 2025 – Present

Data Science Product Manager (SPARK! Practicum Project)

- Partnered with City Councilor Weber's office to assess busing and school integration policies, building data-driven frameworks to evaluate long-term equity outcomes, and inform Boston Public Schools' route-optimization decisions.
- Spearheaded design and launch of an ArcGIS mapping platform enabling interactive enrollment-scenario modeling, revealing that 4% of bus routes drove outsized costs (~\$3M annually) and could be cut without affecting diversity or travel times.

180 Degrees Consulting, Boston, MA

September 2024 – Present

Project Manager & Executive Board Advisor

- Strategized and identified alternative 3 revenue models to improve long-term financial sustainability of a national nonprofit, focused on education and career development for underrepresented students.
- Managed a team of 5 to appraise early-stage impact investment opportunities for a USD \$30M fund, conducting industry analysis, commercial and management due diligence, revenue forecasting, and term sheet evaluation.
- Organized weekly guest speaker sessions, workshops, and mentorship initiatives to strengthen members' networking, consulting, and case-solving acumen; drove client outreach and cold-emailing efforts to securing 2 new project partnerships.
